## ABOUT THE COLLEGE

Brindavan Institute of Technology & Science (BITS-KNL) is established in the year 2008 under the aegis of Creative Educational Society (CES) constituted by a group of academicians and intellectuals.

Presently the college is offering Undergraduate programs in 5 disciplines namely CE, ME, ECE, EEE & CSE and Postgraduate programs in CE & ME disciplines of Engineering. The college started Diploma Courses from the academic year 2013-14. The college which is regarded as one of the premier institutions in and around Kurnool city has been carrying forward the legacy of quality education, guiding thousands of students in shaping their future and moulding them into responsible engineers that the country would be proud of

## ABOUT ISTE

The Indian Society for Technical Education is a National Professional, Non-profit making Society registered under the Societies Registration Act of 1860. First started in 1941 as the Association of Principals of Technical Institutions (APTI), it was converted into "Indian Society for Technical Education" in 1968 with a view to enlarge its activities to advance the cause of technological education in the country. ISTE has an Executive Council at National Level. At present, ISTE has a very large and an effective membership base consisting of more than 1,02,985 Life Members, 5,54,094 Student Members, 2410 Institutional Members (including IITs, IISC, NITS and other leading technical institutions), 1214 Faculty Chapters and 1322 Students' Chapters and 17 Sections throughout the country

## ABOUT THE CONVENTION

The education system, especially the engineering education in India has shown tremendous growth and reliability over the years since independence and today India stands along-side the technology giants and can be considered as a super-power in the fields of Science and Technology with technology that is largely indigenous. The rapid technological advancements in various disciplines of Science and Engineering especially in the field of Information Technology is creating plenty of opportunities for the students and allowing them to showcase their technical expertise. The engineering student today must be suave and technology-savvy with an inclination to adapt to the emerging demands in the fields of Science, Engineering and Technology. The concept of Make-in-India allows the technologically advanced countries to manufacture their products in India, with our engineering students being the workforce. This indeed could be a great challenge for both the students and the engineering colleges they are being trained in. The arena is open with a plethora of opportunities and unthought challenges for the engineering students in the years to come. It is in this context that the ISTE State Level Student Convention has adopted the theme "MAKE IN INDIA- OPPORTUNITIES FOR TECHNICAL STUDENTS"
